Integrated Text and Layers: You can edit text and layers concurrently. You can edit layers without first entering text; conversely, you can edit text without first entering layers. This makes it easier to design. (video: 3:18 min.) Better editing and integration: The canvas includes several new commands for editing and integrating things. You can extend or shrink layers, selectively edit parts of them, and create new layers. You can edit and annotate images on the canvas with layers, filters, and a vector drawing. (video: 3:52 min.) Component Drafting and Workflows: Go to any part of the design and click Draw to create a component. This helps you quickly create a "package" of design components. Then, you can replace existing components with the same component or another type. You can draw, insert, and animate components. (video: 5:19 min.) Trees for drawing and model views: Click the Command Bar's drawing tree to access different views of the drawing. Select your preferred view and start drawing; you can then select the command you want to use. You can save the chosen view as a template. (video: 3:57 min.) Automatic data exchange: Automatic data exchange makes it easier to integrate work on the drawing with work on other drawings. You can open an external drawing and bring it into your drawing, or open or merge a drawing and bring it into your drawing. You can also use data exchange to integrate design into your models. (video: 3:52 min.) Graphical and interactive design tools: Use the Dictate command for words or numbers and the Text command to add text. The Text command has many options for customizing the text. You can add captions to shapes, text, or other text. You can add arrows, brackets, or other lines and shapes to text. You can copy and paste text. (video: 6:10 min.) Fast workflow tools: Use the design command to sketch objects in the drawing, interactively. Use the main canvas to sketch boxes, lines, circles, polygons, or any other object. Use the command bar to select objects from the drawing and place them in the main canvas. (video: 4:54 min.) Drawing views: Use the Command Bar's Drawing Tools icon to view a
